

Energetic Lighting’s LED Bed Light emulates the traditional bi-directional fluorescent fixtures used throughout hospitals and the general medical/nursing industry. Two diffuser panels direct light down, up, or in both directions; 44W (4,500 lumens) downlight, 22W (2,250 lumens) uplight, or 66W (6,750 lumens) altogether. A convenient switchable indicator nightlight is provided next to the pull chain switches, which can be extended to customize the chain length and reach. A 50,000 lifehour rating backed with a 5 year warranty will ensure that this fixture will continue to run for many years of dependable service.

Features

- Selectable Bi-directional up/down lights
- Nightlight indicator light adjacent to pull switch
- No UV or IR radiation
- Minimalistic and efficient design
- Mercury-free construction
- Suitable for Damp Location use
- Easy and secure installation

Applications

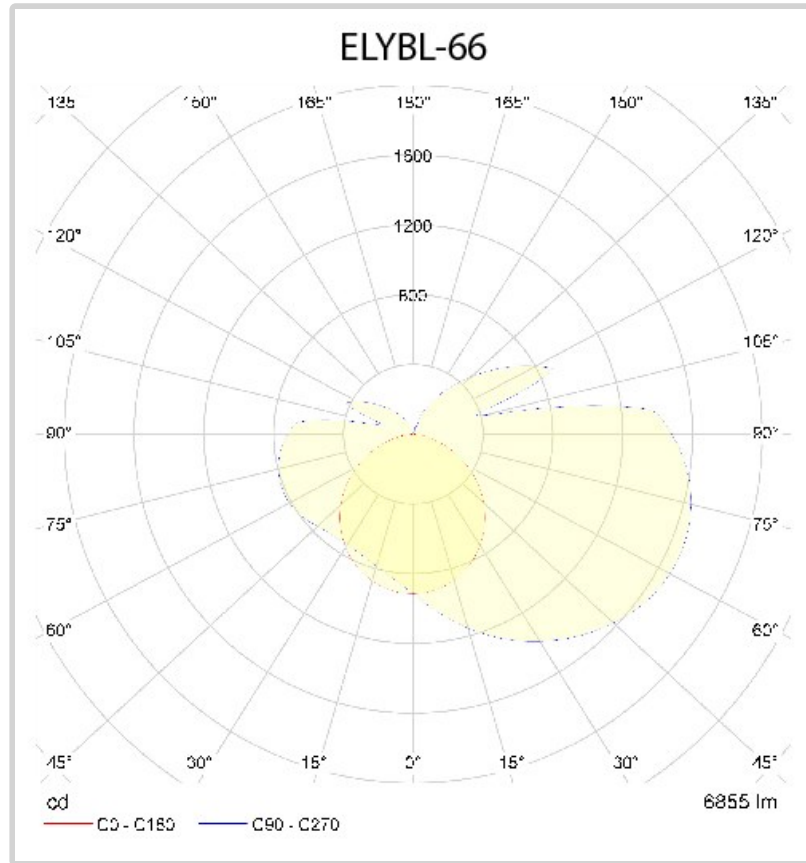

- Patient bed overhead lighting
- Overhead task lighting
- Bi-directional area lighting
- General lighting
